

REMARKS

Applicants acknowledge the Examiner's careful review and consideration of their application.

Applicants canceled claims 1-17, 23 and 25-38.

Applicants amended claim 18 and its dependent claims to be process claims. The amended language is consistent with the patentable composition in claim 18 in Applicants' parent patent.

Applicants have added new claims 39-44 to patentable embodiments that are consonant with the claims in the parent patent.

Applicants present new claims 45 *et seq.* based on their original application, and the claims 25-36 in their parent patent grant. The specification describes improving deposit performance and attention is respectfully directed, for instance, to page 6, lines 15-20, and page 10, line 6 to page 12, line 10.

The claims avoid carbon disulfide and are patentable over the Nalesnik et al. reference.

Applicants respectfully traverse the common law obviousness type double patenting rejection. The claims herein would not have been suggested by the invention of claims 1-34 of U.S. Patent No. 6,509,303. The claims herein would not have been considered obvious from claims 1-44 in Applicants' U.S. Patent No. 6,645,921. However, without prejudice, and in an effort to resolve issues towards an allowance, a terminal disclaimer is submitted herewith. The undersigned has received authorization to submit this terminal disclaimer on behalf of Applicants' assignee.
